COMPANY OVERVIEW

BUSINESS PROFILE · PRODUCTS · MARKET POSITION

Apple Inc. (AAPL) designs, manufactures, and markets consumer electronics including the iPhone, Mac computers, iPad tablets, wearables, operating systems, services like iCloud and Apple Pay, and digital content via iTunes and other portals. It operates in the technology sector, serving creative, education, government, and consumer markets.

The company's integrated ecosystem is the cornerstone of its competitive moat – driving services revenue growth and sustaining extraordinary customer retention. Key products span hardware, software, and a rapidly expanding services segment that includes Apple Pay, iCloud, the App Store, and Apple Intelligence AI features.

Apple leads in consumer electronics with a strong brand, innovative ecosystem, and services lock-in as key moats. Market re-rating from growth compounder to high-quality compounder reflects the company's consistent outperformance via profitability metrics.
